

Dear Parents,

These are indeed tough trying times for all of us. The outbreak of this Pandemic has definitely jerked us out of our slumber towards the choice of our priorities. It has given an opportunity to all parents to re-bond with their children.

Schools have been shut down but the process of learning must go on. Even this Pandemic will for sure leave behind a lot of learning for us.

Parents must ensure that children utilise their time well. Make a schedule for them which should definitely include Reading & Writing. Encourage them to read books available with them and if none are there then ask them to read stories from their old books. Remember any type of reading will help. Converse and communicate with your children and don't leave any opportunity unturned in this time of being confined in the safety of the four walls of your homes.

I wish and I hope that no-one gets to see such situation at least in our lifetimes.

Parents, my Staff and I are sensitive to the current situation and hence are now trying to send you assignments through I - Gaurdian. Please ensure that children complete these assignments regularly so that they can enhance their knowledge even in the time of lockdown.

There are also Learning Apps available which can be downloaded for free upto 31st March'2020.

Do spend time with your children and help them to download such apps.

Please keep yourself updated with the messages and assignments sent by the Teachers. Parents should also ensure that children don't misuse your/ their mobiles, tablets or desktops for indulging in sites which are not meant for them. Remember these days our children are much smarter than us.

I wish each one health and prosperity in the days to come. Stay indoors and keep safe. There is nothing more important than life.

GNPS Fraternity joins me in sending you wishes for healthy and safe life ahead.

God Bless & Keep Safe

Reema Punj
